iMINT Prime

User Guide

A practical walkthrough for members, traders and dealing teams — from first login to the fund and BDRs utilization.

India International Bullion Exchange IFSC Ltd. | GIFT City, Gujarat

ABOUT THIS GUIDE

Who It's For, And What You'll Learn

This guide provides trading members and dealing teams with a comprehensive overview of the iMINT Prime platform, covering key processes from user login and market access to order placement and trade execution, trade monitoring, and fund and BDRs utilization.

Who It's For

Traders, dealing desks, member-firm operations staff and compliance reviewers.

What You'll Use

The iMint Prime desktop application, connected to your assigned Member and Trader Code.

What You'll Achieve

Confidence to log in, trade, monitor and reconcile fund usage independently.

INTERNET CONNECTIVITY

WHITELIST / ALLOW ACCESS

PARAMETER	DETAILS
URL	prime.iibx.co.in

BROADCAST PORT	7491-7492
CONNECTIVITY	INTERNET

WHAT WE'LL COVER

Five Steps, Start To Finish

01

Getting Started

Log in to iMint Prime and explore the default market watch.

02

Market Watch Setup

Build and configure a custom watch list for the contracts you trade.

03

Placing Orders

Enter Buy and Sell orders step by step in the Spot market.

04

Monitoring Orders & Trades

Review the order book, market depth and trade book.

05

Fund & BDR Utilization

Check EPIF and BDR allocation and usage for each client.

01

Getting Started

Log in to iMint Prime and explore the default market watch.

Login to iMint Prime

1. **Download**

   Get the installer from the official IIBX downloads page (https://iibx.co.in/Technology/Downloads).

2. **Launch & Identify**

   Open iMint Prime and enter your assigned Member Code and Trader Code.

3. **Authenticate**

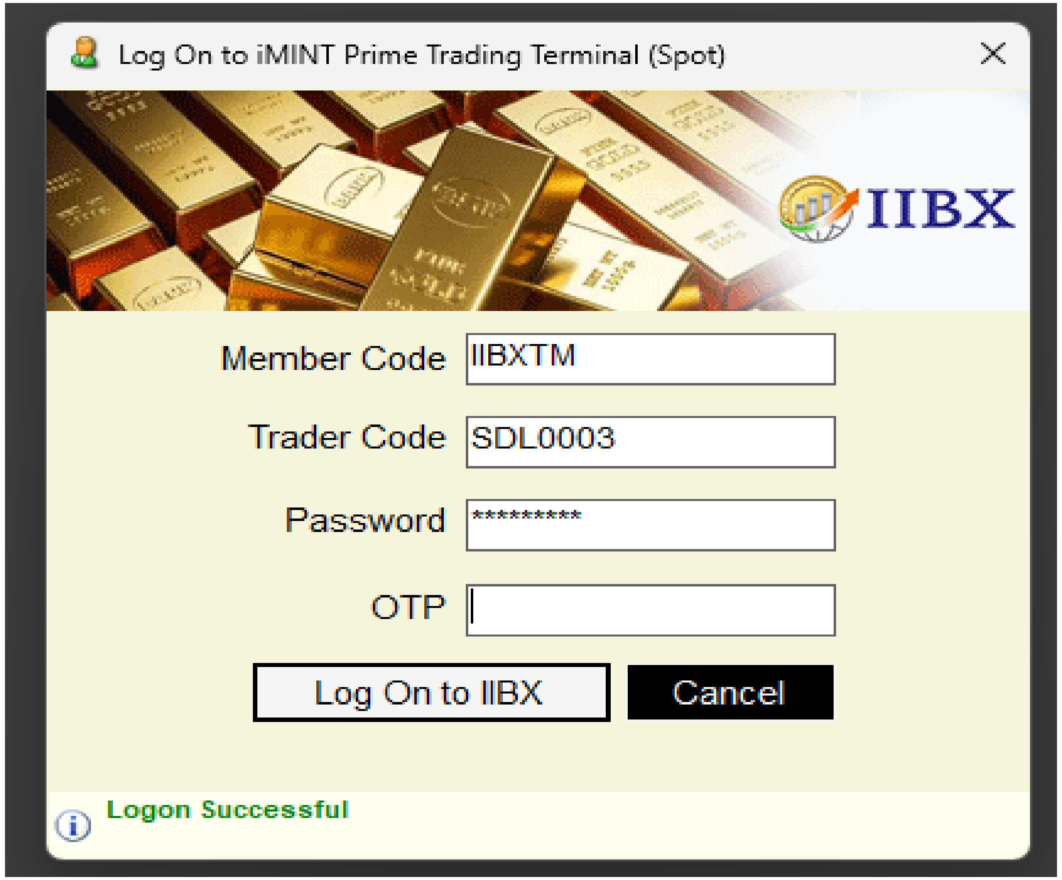
   Enter your Password, then click “Log On to IIBX”

4. **Verify OTP**

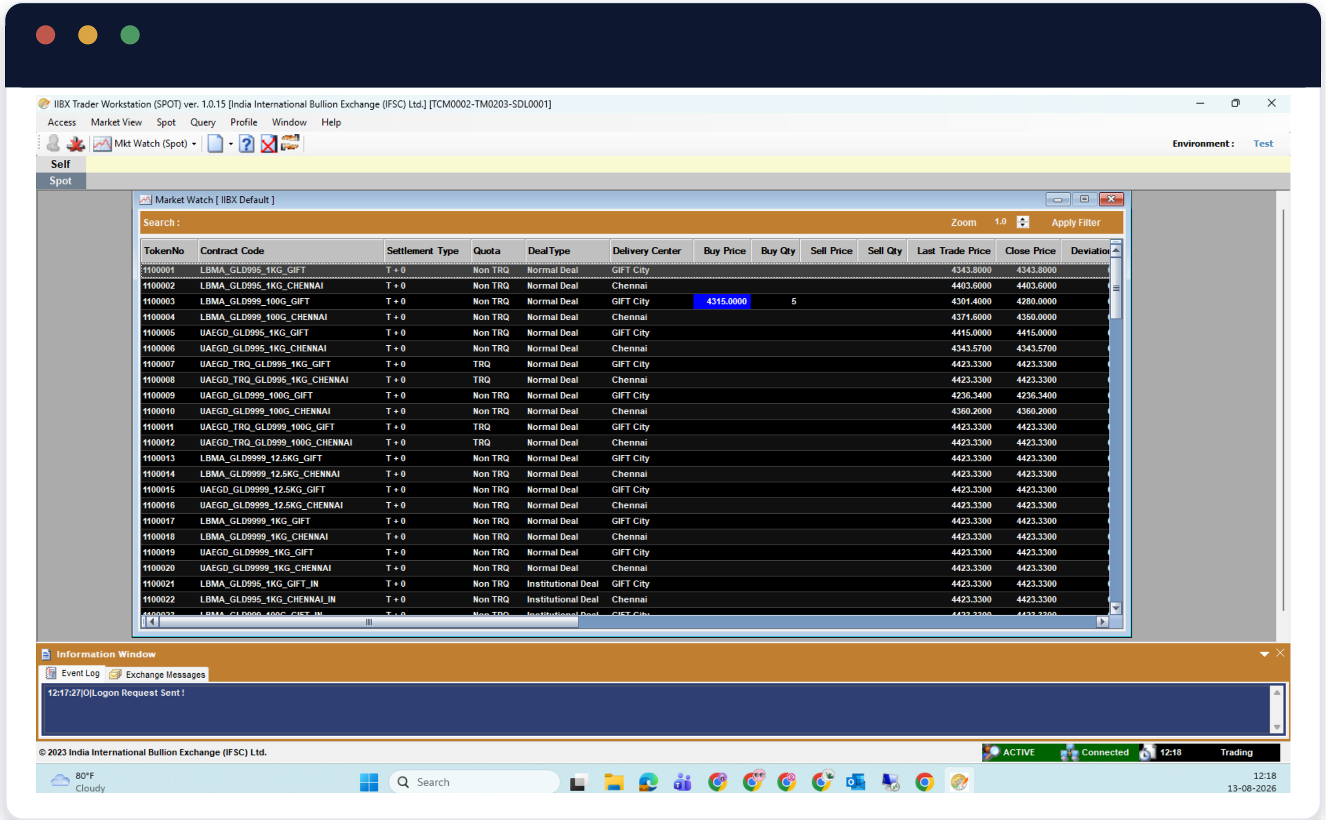
   Enter the OTP sent to your registered email ID, then log on again to confirm.

5. **Confirm Connection**

   Check the status bar shows Active and Connected before placing orders.



Default Market Watch



1 Auto-Load

The IIBX Default watch appears automatically after logon.

2 Columns

Cover Token No, Contract Code, Settlement Type, Quota, Deal Type and Delivery Center etc.

3 Live Pricing

Buy/Sell Price, Quantity, Last Trade and Close Price refresh in real time.

02

Market Watch Setup

Build and configure a custom watch list for the contracts you trade.

Create a New Market Watch

1 Open

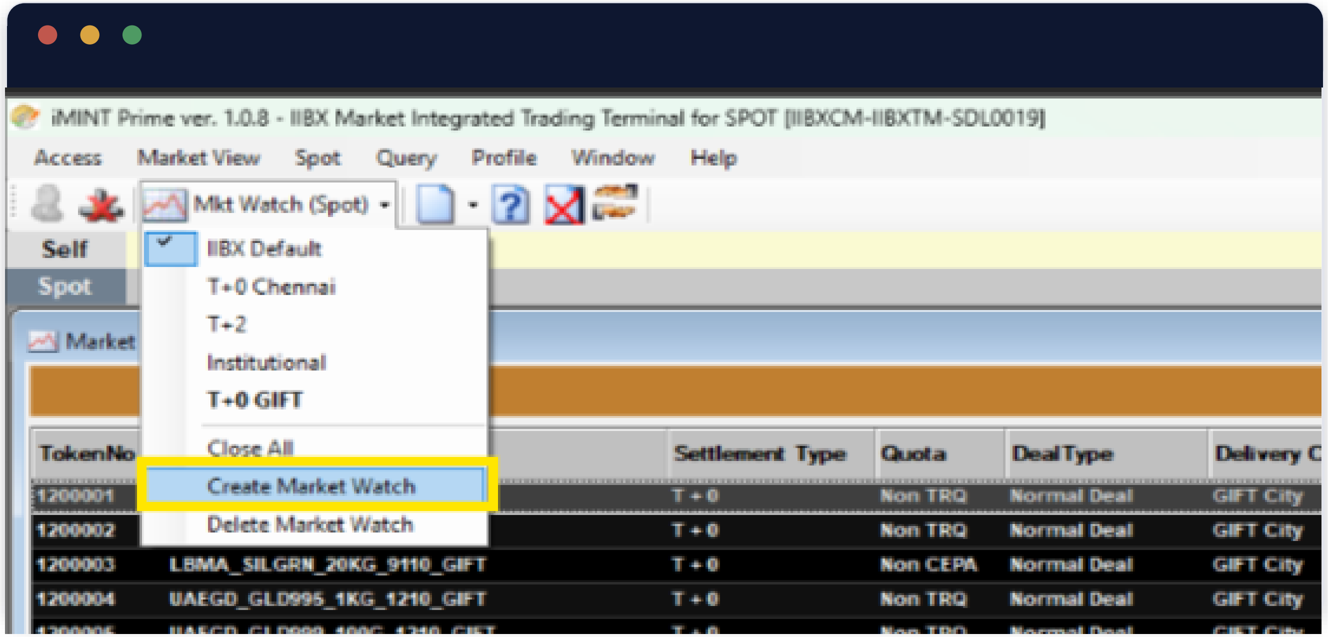
Open the Mkt Watch (Spot) dropdown on the toolbar.

2 Create

Select “Create Market Watch” to start a custom watch list.

3 Manage

Manage existing MarketWatch (T+0, T+2, Inst…) or delete one from the same menu.



Name and Style the Watch

1 **Name It**

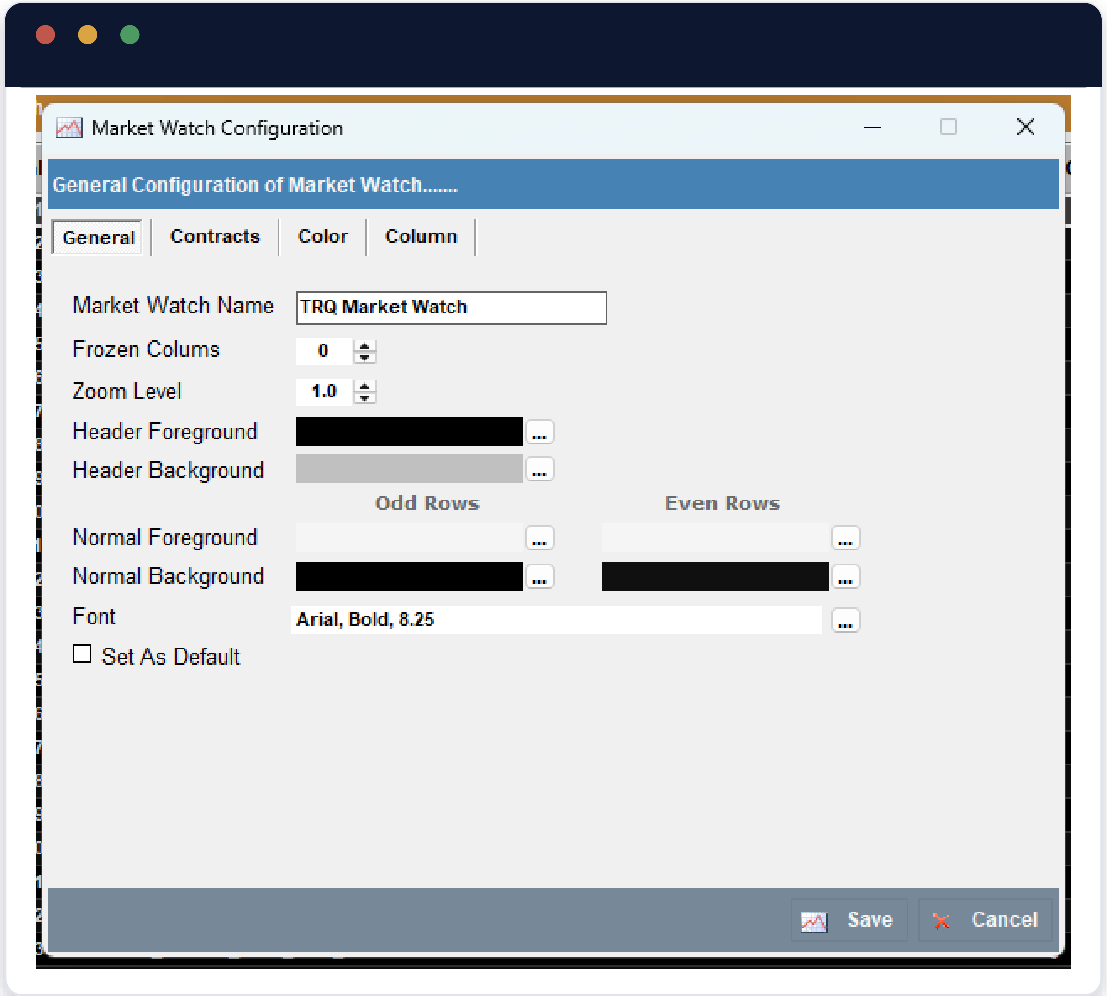
Give the new watch a clear name, e.g. “TRQ Market Watch.”

2 **Customize**

Adjust frozen columns, zoom level, fonts and row colors to suit your view.

3 **Set Default**

Tick “Set As Default” so it loads automatically at next logon.



Select Contracts to Track

1

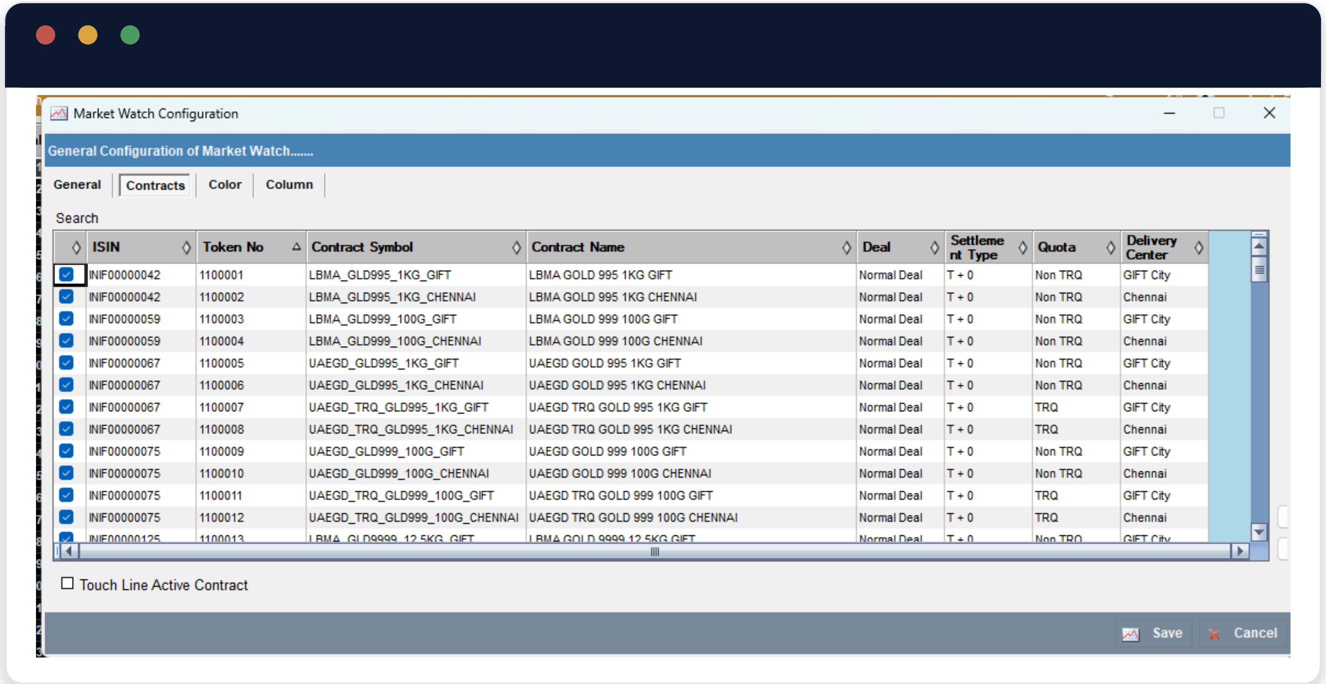
Select

Check the contracts to include — e.g. LBMA/UAEGD Gold and TRQ series.

2

Save

Save to add the configured watch to the Mkt Watch (Spot) menu.



03

Placing Orders

Enter Buy and Sell orders step by step in the Spot market.

Buy Order Entry (F1 / +)

BUY

1 **Open**

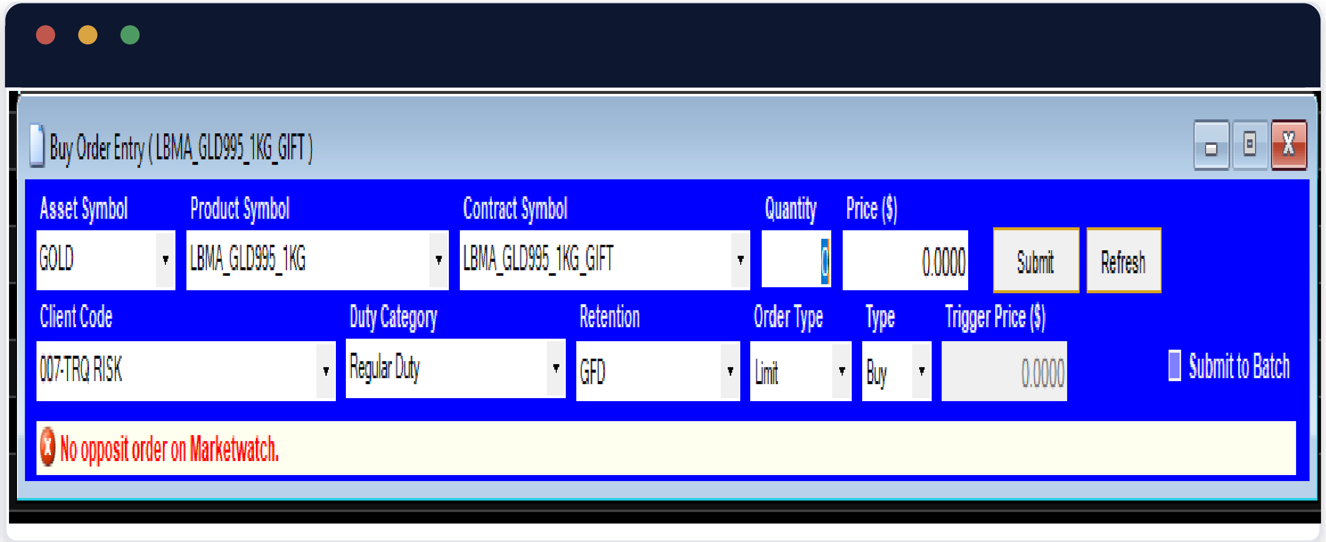
Open Buy Order Entry from the market watch for the chosen contract.

2 **Selection**

Set Client Code, Duty Category, Retention and Order Type.

3 **Submit**

Enter Quantity and Price, then submit — the Event Log confirms the outcome.



Sell Order Entry (F2 / -)

SELL

1 **Open**

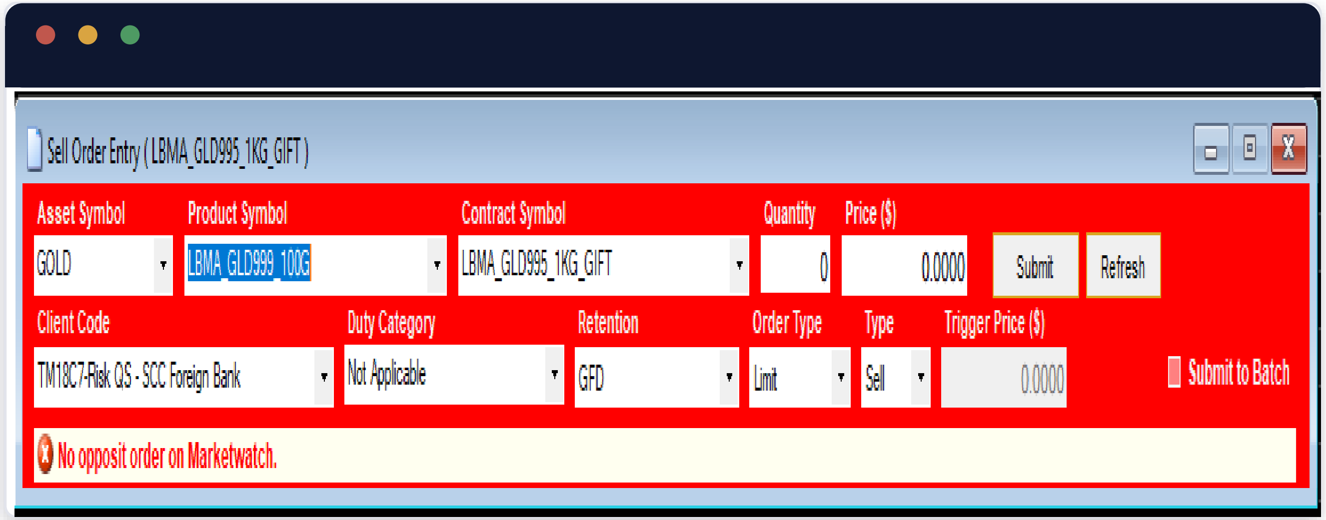
Open Sell Order Entry from the market watch for the chosen contract.

2 **Selection**

Choose Client Code, Retention (e.g. GFD) and Order Type before submitting.

3 **Track**

Track acceptance or rejection instantly in the Event Log below.



04

Monitoring Orders & Trades

Review the order book, market depth and trade book.

Order Book (F3)

1 View

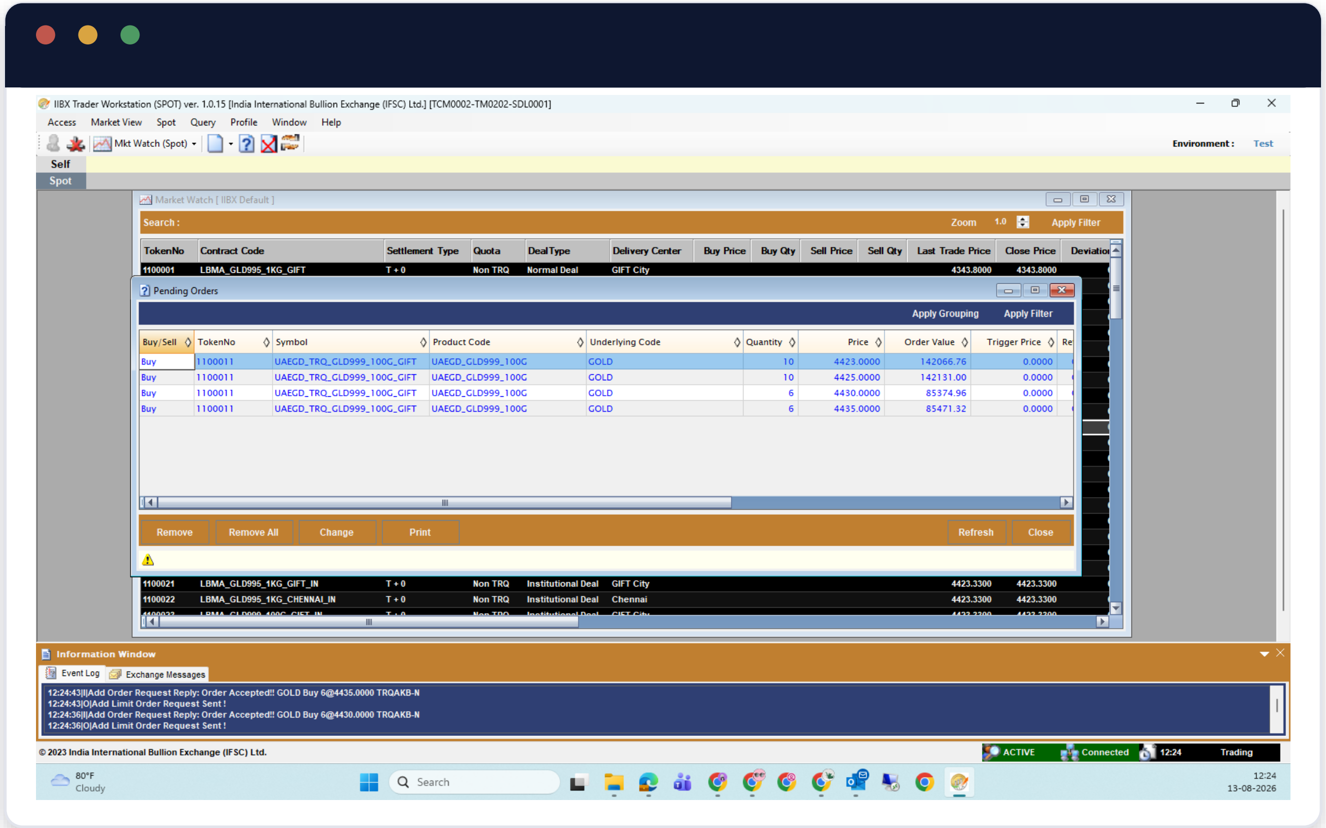
See every live, unmatched order by Token No, Symbol and Product Code.

2 Review

Check Quantity, Price, Order Value and Trigger Price at a glance.

3 Act

Remove, Remove All, or Change an order directly from this screen.



Modify a Buy or Sell Order

1
Locate

2
Initiate Change

3
Edit & Submit

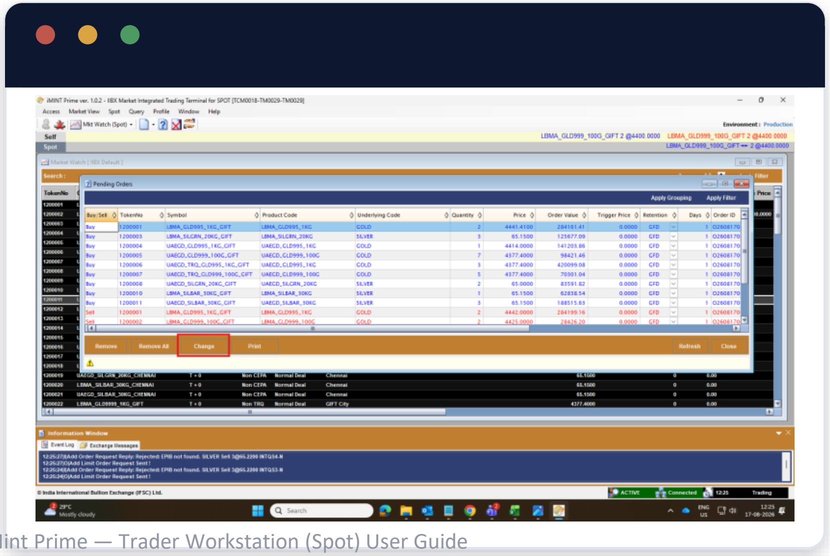
4
Verify

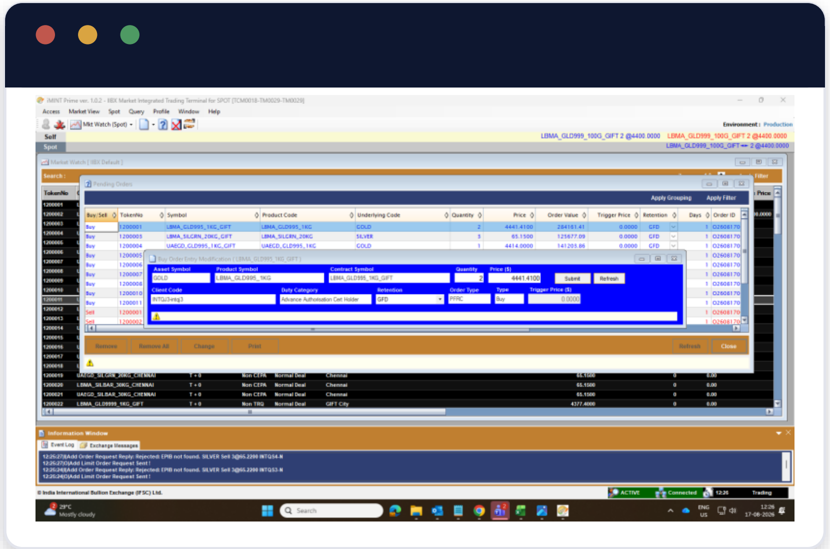
Open Spot- Order Book (Pending) or F3 and select the Buy or Sell order to change.

Click "Change" to open the Order Entry Modification window.

Adjust Quantity and/or Price as required, then click "Submit."

Confirm the update appears correctly in Order Book / Pending Orders.





Market Depth (F5)

1 **Market Picture**

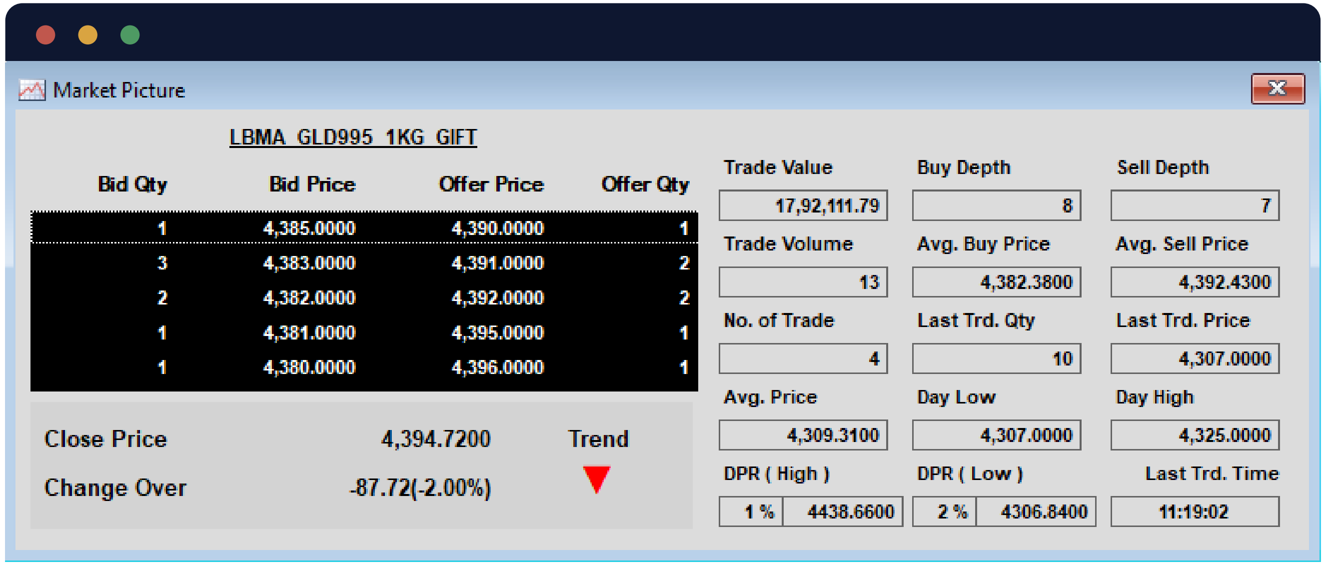
Shows live Bid/Offer depth for the selected contract.

2 **Track**

Monitor Trade Value, Volume, Avg. Buy/Sell Price and Day High/Low.

3 **DPR Bands**

Mark the day's permitted high/low price range.



Trade Book (F8)

1. **Lists**

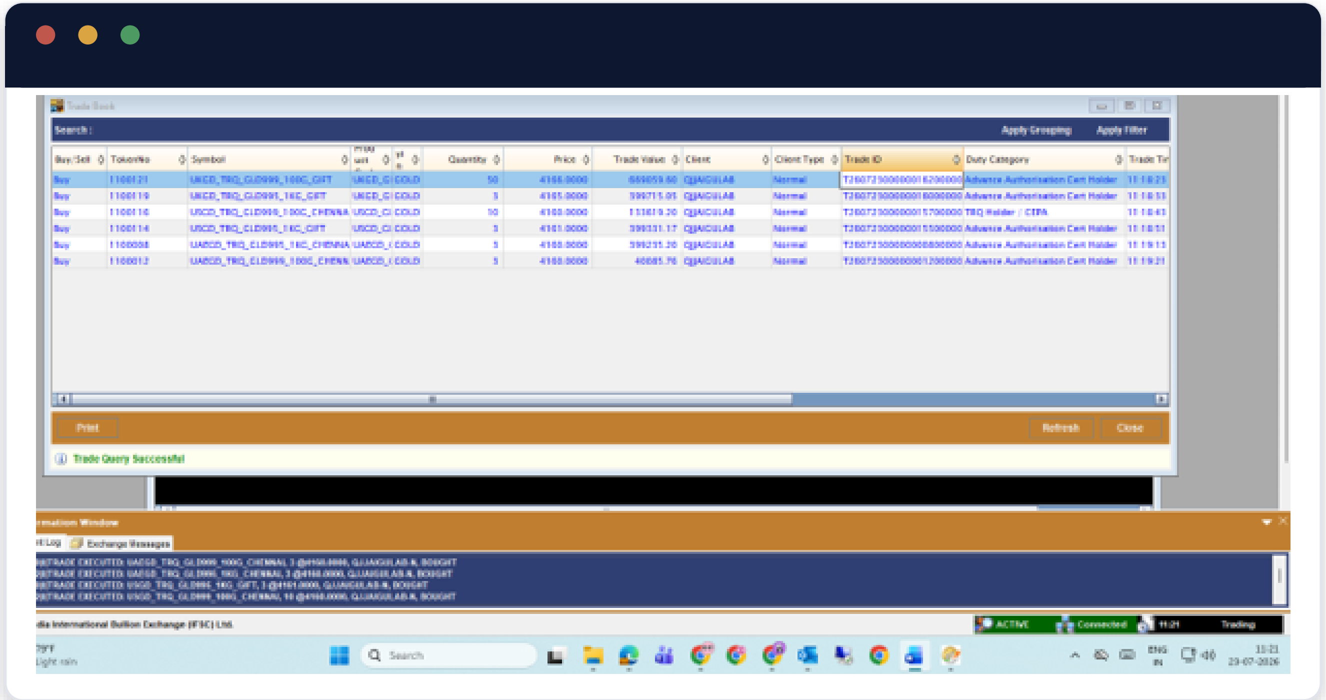
   Every executed trade with Trade ID, Client and Duty Category

2. **Captures**

   Buy/Sell side, Symbol, Quantity, Price and Trade Value.

3. **Distinguishes**

   TRQ Holder trades from Advance Authorization Certificate Holder trades.



05

Fund & BDR Utilization

Check EPIF and BDR allocation and usage for each client.

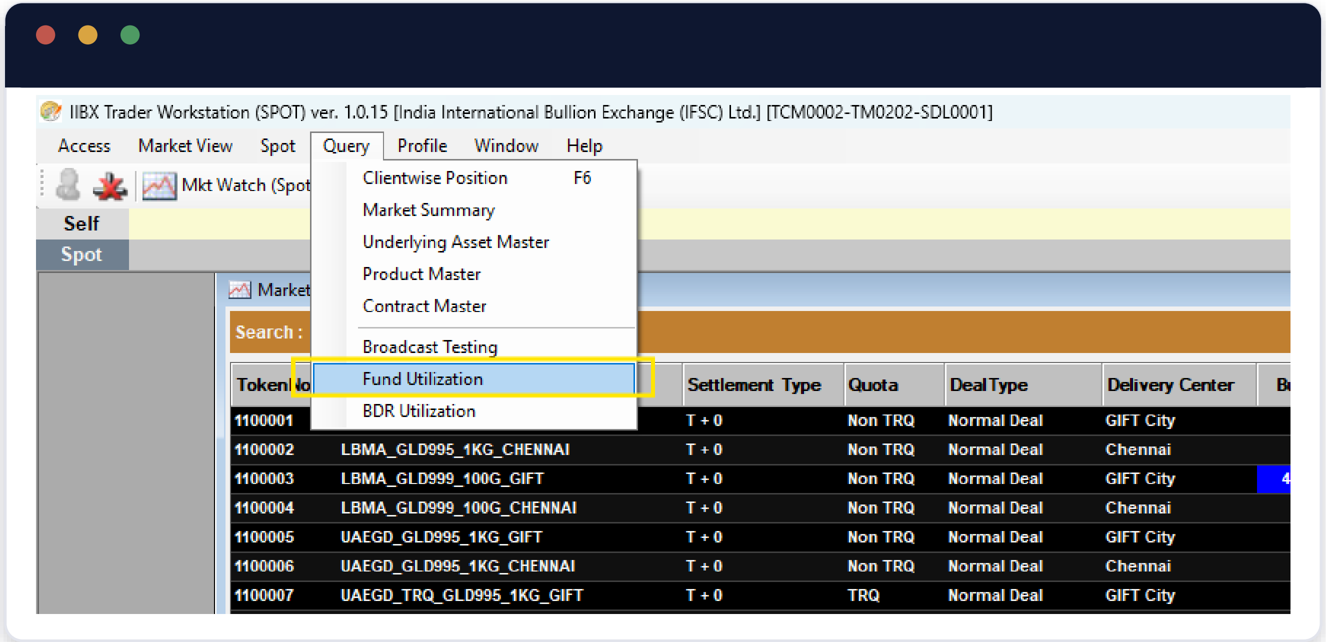
Accessing Fund Utilization

1. **Open**

   Open the Query menu on the toolbar.

2. **Select**

   Choose “Fund Utilization” to check EPIF allocation per client.



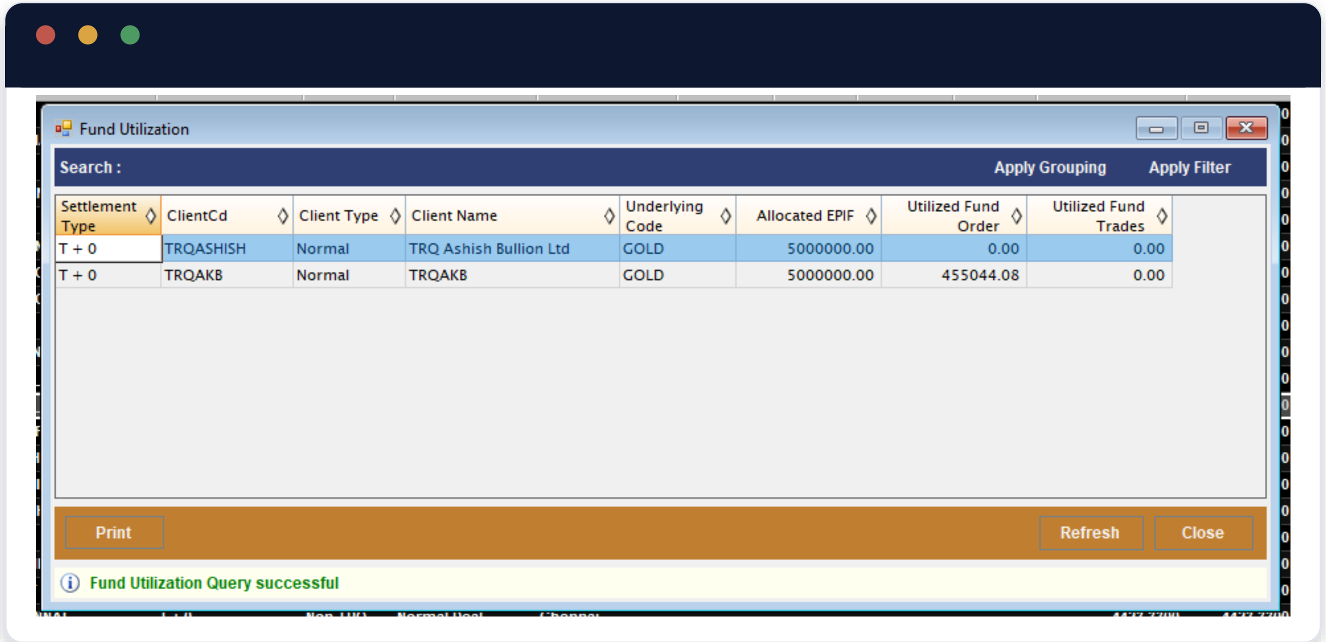
Fund Utilization Report

1. **Live Columns**

   Shows ClientCd, Client Name, Underlying Code and Allocated EPIF.

2. **Refresh & Print**

   Use Refresh for the latest figures, or Export the view using Right Click.



REPORT FIELDS AT A GLANCE

ClientCd	Client Name
Underlying Code	Allocated EPIF
Utilized (Order)	Utilized (Trades)

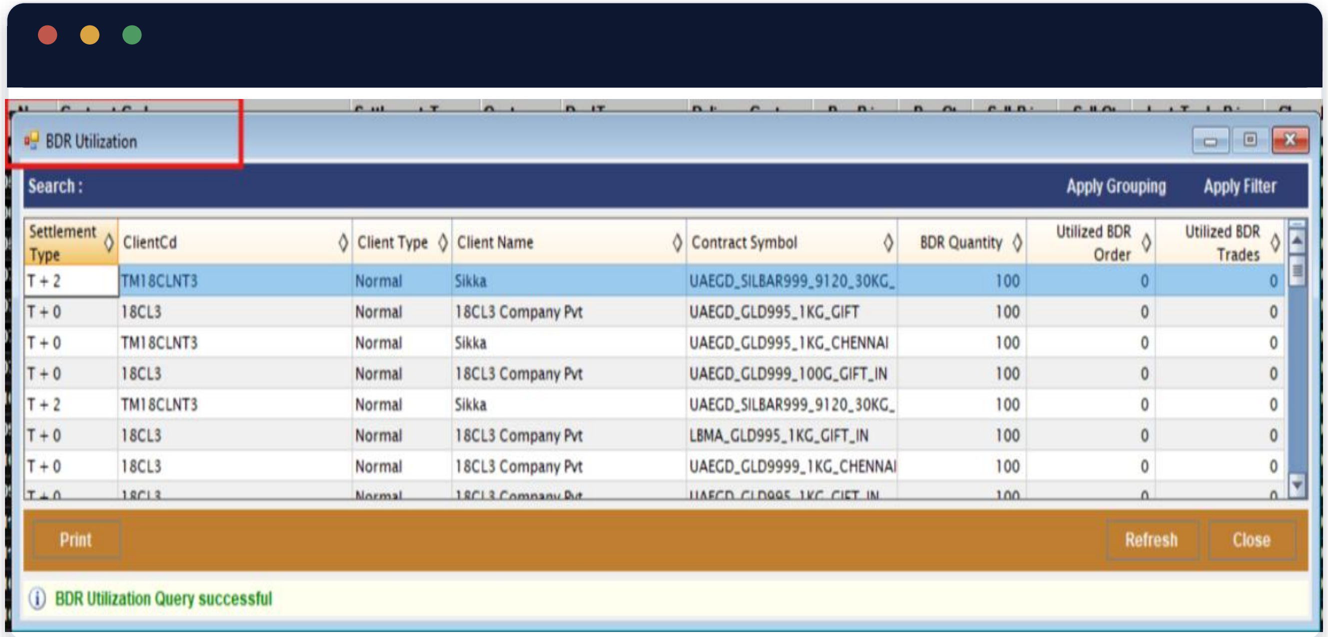
Accessing BDR Utilization

1 **Open**

Open the Query menu on the toolbar.

2 **Select**

Choose “BDR Utilization” to check BDR allocation per client.



BDR Utilization Report

1 **Locate It**

Found in the same Query menu as Fund Utilization.

2 **Track**

Bullion Depository Receipt allocation and usage per client.

3 **Same Tools**

Grouping, filtering and refresh work exactly as in Fund Utilization.
