

Circular No.	IIBX-TECH-2026-070	Circular Date	11-Aug-2026
Category	Technology	Segment	Spot
Subject	API Document for New Trading & Clearing Platform		
Attachments	IIBX SPOT - API Document - Ver 1.0.2.pdf		

In accordance with the provisions of the Rules, Regulations and Bye-Laws of the Exchange, Members are hereby informed that the Exchange is implementing a new **Bullion SPOT Trading and Clearing Platform**.

In continuation of Circular No. **20240809-2 dated August 09, 2024**, issued in respect of the **Application Programming Interface (API) for CTCL Facility**, the Members of the Exchange are hereby notified as under:

New SPOT Trading Application Programming Interface (API) for Central Trading System: The APIs applicable to the new Bullion SPOT Trading Platform are annexed to this Circular. The Exchange has endeavored to maintain, to the extent feasible, uniformity between the APIs of the new SPOT Trading Platform and the existing Futures Trading Platform, with a view to facilitating and expediting the integration of third-party trading and algorithmic trading software currently developed for the Futures Trading Platform with the new SPOT Trading Platform.

Implementation by Members: Members are advised to undertake the necessary changes and/or upgrades, as may be required, in their respective CTCL/Algo Software to ensure compatibility with the revised APIs and seamless continuity of their trading operations. Members are also advised to coordinate with their respective CTCL/ISV Software Vendors, wherever applicable, and ensure that the required changes are implemented, integrated and adequately tested within the stipulated timelines.

Connectivity: Members hereby advised that API connectivity to the new SPOT Trading Platform shall be available only through the VPN connection provided by the Exchange. Members and their respective CTCL/ISV Software Vendors are advised to contact the CTCL Team of the Exchange to obtain the requisite VPN access credentials and member connectivity details, including the destination IP address and port number required for establishing connectivity with the new SPOT Trading Platform through API. Members are advised to ensure that the necessary network and system configurations are completed and tested well in advance of the Go-Live date.

Applicability: Members may please note that the aforesaid APIs shall become applicable only upon the Go-Live of the new IIBX SPOT Trading and Clearing Platform, which is tentatively scheduled for August 27, 2026. The Go-Live date shall be confirmed separately by the Exchange through appropriate communication. Members are advised to take note of the above and ensure the necessary preparedness and readiness at their end for a smooth, seamless and timely transition to the new SPOT Trading Platform.
